## THE LONG TERM OUTLOOK FOR THE CATTLE BUSINESS IS GOOD

An increase of about 1½ million head in the annual cattle inventory is now required to keep pace with the population increase of 3 million persons annually. We will need an increase up to 110 million head of cattle by the middle of the 1960's to produce the present amount of beef per capita. This is information furnished by reliable economists, and at the same time they urge producers to replace older and inferior animals, in their herd, with younger animals of better quality.

There will be bulls and females in this sale for the rancher, farmer and purebred producer. A Shorthorn bull will sire calves with great weaning weights by 50 to 100 lbs. Shorthorn bulls are unexcelled for crossbreeding; they "beef up" the calf crop and put "doing ability" to work for you. THEY are the BEEF BREED.

If you'd like any further information about the cattle we are selling in this sale, write or contact any of the consignors or the sale manager and they will be pleased to help you.

# WYO-BRASKA SHORTHORN SALE

## American Shorthorn Breeders' Ass'n. Guarantee

1. Proper care must be given by purchaser to protect qualities and health of guaranteed animals.
2. All bulls are guaranteed breeders, provided they are not allowed to serve when under 14 months of age, or allowed to run with the herd when under 20 months of age. In case of failure of a bull to be a breeder notice shall be given to the seller within six months of date of purchase, or by the time the bull is 20 months of age, if purchased under 14 months of age.
3. With the exception of heifers sold under 14 months of age, all females are guaranteed breeders. Heifers under two years of age shall not be served by a heavy or old bull. Cows or heifers sold as bred, or safe in calf, not proving to be in calf must be reported to the seller within three months after date of sale. Females over 14 months of age sold open, not settling within six months after date of sale, shall be promptly reported to the seller.
4. When an animal fails to comply with the above guarantee the seller has the option of substituting an animal of equal value to the satisfaction of the purchaser, or of having the animal returned for a trial for a period not to exceed six months. The expense of freight in such case is to be paid by the seller. If the animal is then proved to be a breeder beyond doubt it shall be returned to the purchaser at his expense. In case of dispute the return of the full purchase price, without interest, to the buyer will be considered full settlement and satisfaction of all claims. No charge for feed or maintenance shall be made by either buyer or seller. Salvage shall go to the seller. It shall be understood that the same guarantee given for the first animal shall likewise apply to any animal later submitted.
5. All animals are sold to comply with the laws regulating Tuberculosis and Bang's disease of the state or county into which they may be shipped.
6. Certificates of registry and transfers will be furnished with each animal sold. A signed pedigree application for unborn calves should be furnished with bred females, showing names and record numbers of sire and dam, as well as service date.
7. Shipment will be made as soon as possible after the close of the sale, but at purchaser's risk of loss or injury after animal is bid off. Where cattle are sold at private treaty the above terms should apply as well as for sale at auction.

All animals sold in this sale will be backed by the above Standard Guarantee.

As a safeguard to prospective buyers, every animal has successfully passed a clean abortion blood test within 30 days prior to the sale, or will have Certificates of Bangs Calfhood Vaccination, and those that are not from Accredited herds have passed a clean Tuberculin test within the same period. Health certificates will be provided with each lot sold.

### JUST ONE MORE WORD

"If producing beef is your business,  
you'll certainly like those heavier  
calf crops you'll get at weaning time that  
are sired by Shorthorn bulls. Buyers also will  
pay premium prices for those straight bred or  
crossbred Shorthorn calves because they know  
they will gain better for them in the feedlot.  
See the fifty-two bulls that are listed  
inside this catalog."
